## **DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to a temperature controlled environment, classified in class 219, subclass 211.
  - II. Claims 18-19, drawn to a method for creating a warm environment, classified in class 219, subclass 229.
  - III. Claim 20, drawn to a hunting blind, classified in class 219, subclass 217.

The inventions are distinct, each from the other because of the following reasons:

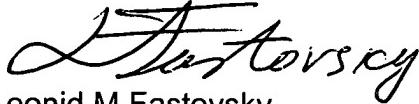

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Group II is used to partially enclose a user.
3. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Group II does not require means for seating.
4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention I has separate utility such as by not requiring means for seating. See MPEP § 806.05(d).
